

MONTHLY BUDGET FORMS

Get your monthly bills together as a reference and decide what you are going to spend under the categories listed. Add up each category and write in your totals. When you're done with your budget your total income minus your total expenses should always equal zero. If it doesn't, you will need to look at where you are spending your money and make adjustments.

Now that you have a plan, stick to it, take out cash for things you are likely to spend impulsively on like food, clothes, and entertainment. We've written in a full example for you on the back of this sheet to give you an idea of what a monthly budget could look like. For more budget sheets and resources on how to win with your money, email us at hello@destinationchurch.cc

INCOME	
	Amount
Income 1	2,000
Income 2	1,500
Income 3
